1. INCORPORATION, NATURE OF OPERATIONS, GOING CONCERN UNCERTAINTY, AND CONDENSED FINANCIAL INFORMATION

Incorporation and nature of business

The Company, incorporated under Part IA of the Québec *Companies Act* and governed by the provisions of the Québec *Business Corporations Act*, is an oil and gas exploration company. Its stock has been listed on the TSX Venture Exchange since February 16, 2005 under the symbol PEA. Its head office is located at 305 Charest Blvd. E., 10th Floor, Québec City, Québec, Canada G1K 3H3.

Going concern uncertainty

These consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, 12 months from the period ended March 31, 2015. Management is aware, in making its assessment, of material uncertainties related to events and conditions that cast significant doubt upon the Company's ability to continue as a going concern. These consolidated financial statements do not include any adjustments to the carrying amounts of assets, liabilities, income and expenses and to classifications in the statement of financial position that would be necessary if the going concern assumption were not appropriate. Such adjustments could be material.

The Company has yet to determine whether its oil and gas properties contain economically feasible reserves. The Company's ability to generate revenue from its oil and gas properties hinges on its ability to economically operate its oil reserves, obtain the necessary financing to pursue property exploration, evaluation, development and construction, begin commercial production, or generate proceeds from the disposal of its exploration and evaluation assets.

For the periods ended March 31, 2015 and 2014

In addition to ongoing working capital requirements, the Company must secure sufficient funding to meet its existing obligations and commitments under exploration and evaluation programs and pay general and administrative expenses. Management considers that those funds will not be sufficient to meet the Company's anticipated obligations and expenses through to March 31, 2016. Any shortfall could be met in a number of ways in the future, including but not limited to, the issuance of new debt or equity instruments, additional cost-cutting measures or the introduction of new partners, on which the Company is already working. If management is unable to secure new funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than the amounts reflected in these financial statements.

Condensed interim consolidated financial information

The financial information as at March 31, 2015 and for the three-month periods ended March 31, 2015 and 2014 is unaudited. However, it is management's view that all adjustments required to present fairly the results for these periods have been made. The adjustments made were of a normal recurring nature. The interim consolidated operating results do not necessarily reflect the operating results anticipated for the full fiscal year.

2. BASIS FOR THE PREPARATION OF CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

These condensed interim consolidated financial statements were prepared in accordance with IAS 34, *Interim Financial Reporting*, published by the International Accounting Standards Board ("IASB") and set out in the *CPA Canada Handbook - Accounting*. The accounting policies applied in these condensed interim consolidated financial statements are the same as those in the most recent annual financial statements. The condensed interim consolidated financial statements should be read in conjunction with the audited annual financial statements for the fiscal year ended December 31, 2014, including the notes thereto.

All amounts are expressed in Canadian dollars.

5. INVESTMENTS IN ASSOCIATES

Anticosti property

Transaction details

On March 31, 2014, the Company completed a transaction that resulted in a partnership, Anticosti Hydrocarbons L.P., which owns and operates the licences held previously by Pétrolia and Corridor Resources Inc. The ownership interests of the partners are as follows:

rartners	Ownership interest
Ressources Québec	35%
Pétrolia Inc.	21.7%
Corridor Resources Inc.	21.7%
Saint-Aubin E&P (Québec) Inc.	21.7%

The exploration licences were valued at \$100 million for the purposes of the transaction. Ressources Québec and St-Aubin E&P (Québec) Inc. have undertaken to finance exploration work in an amount of up to \$100 million broken down into two investment phases. Accordingly, Ressources Québec will invest up to \$56.67 million in exchange for a 28.3% interest and St-Aubin E&P (Québec) Inc. will invest \$43.33 million in exchange for a 21.7% interest. To ensure equal interests for the three public corporations and a 35% interest for Ressources Québec, Anticosti Hydrocarbons L.P. made a payment of \$15.2 million to Corridor Resources. Following these transactions, the parties' interests in the partnership are as follows: Ressources Québec owns 35%, Pétrolia 21.7%, St-Aubin E&P (Québec) Inc. 21.7% and Corridor Resources Inc. (CDH-TO) 21.7%. Pétrolia also entered into an agreement with Corridor Resources Inc. under which a maximum royalty credit of \$1,200,000 and a cash amount of \$800,000 were granted to Pétrolia as reimbursement for expenses entirely borne by Pétrolia in previous years. Under this agreement, Pétrolia undertakes to assume Corridor Resources Inc.'s share of royalties relating to the agreement entered into with Hydro-Québec on January 22, 2008.

For the periods ended March 31, 2015 and 2014

During the year ended December 31, 2014, the Company reviewed the calculation of the non-cash gain on transfer of ownership of certain licences ["gain"], adjusting it to \$28,059,532 from \$34,809,059 to reflect the elimination of its \$7,762,671 share in the gain and account for the professional fees incurred for the acquisition of an investment amounting to \$1,013,144 in the value of the investment in an associate rather than against the gain. Those adjustments resulted in a reduction in the investment in an associate and the gain amounting to \$6,749,527, as well a reduction in deferred tax liabilities of \$1,815,623 as at March 31, 2014. Those adjustments also resulted in a \$4,933,904 reduction in net income and comprehensive income as well as retained earnings for the three-month period ended March 31, 2014 and a \$0.073 reduction in net basic income per share and net diluted income per share for the three-month period ended March 31, 2014.

These properties are subject to royalties should they become productive. To date, the Company has satisfied all required obligations, and only its future or potential obligations and special transactions during the year are described below.

Gaspé and Haldimand properties

As at December 31, 2014, Québénergie had complied with the initial agreement which consisted in investing an amount of \$8,500,000 in exploration work. Exploration expenses incurred on the properties held in partnership with Québénergie are now equally borne.

Pétrolia and Québénergie have joint ownership of 13 licences including that for the Haldimand project.

Bourque Project

In May 2012, Pétrolia completed a private placement totalling \$15,575,000, with most of the funds used for the drilling of two wells on the Bourque property. The Company is currently developing a work program for the purpose of identifying the production characteristics of the Forillon formation.

Matapédia property

On July 19, 2013, the Company signed a partnership agreement with Saint-Aubin Énergie S.A.S., a subsidiary of Maurel & Prom and MPI, and proceeded with the joint acquisition of equal shares of 13 licences in the Gaspé Peninsula.

10. PROVISION FOR SITE RESTORATION

Management calculates the total provision for future site restoration based on the Company's net share of the estimated costs of abandoning and restoring wells and facilities and the estimated timing of future costs to be incurred.

As at March 31, 2015, the total future estimated amount required to settle obligations related to site restoration, indexed at 2.5% [December 31, 2014-3.5%], stood at \$1,110,770 [December 31, 2014 - \$816,220]. The total future amount was discounted using a weighted average rate of 3% [December 31, 2014-5.25%] over a 20-year horizon [December 31, 2014-

For the periods ended March 31, 2015 and 2014

The following table presents the reconciliation of the provision for site restoration:

	As at March 31, 2015	As at December 31, 2014
Balance, beginning of period	816,220	718,180

•	1,110,770	816,220

During the period ended March 31, 2015, the Company reviewed the assumptions used in calculating the present value of the estimated future amount required to settle site restoration obligations. This change in accounting estimates resulted in a \$286,281 increase in the provision for site restoration and exploration and evaluation assets and a \$1,158 decrease in accretion expense for the period.

11. SHARE CAPITAL

During the period ended March 31, 2015, the Company issued 2,728,500 flow-through shares under private placements for gross proceeds of \$2,182,800. Issuance costs of \$151,882 were paid in cash and recognized as a reduction in the Company's share capital.

Share-based payments

On October 22, 2004, the Company adopted a stock option plan under which it can grant a maximum of 10% of the number of shares outstanding to its directors, officers, key employees and suppliers on a continuous basis. The exercise price of each option equals the market price on the day prior to the grant of the option. All options must be exercised no later than five years after the date of the grant. The options granted to directors vest immediately and for other participants, over a period of three years.

All share-based employee compensation will be settled in equity. The Company has no legal or constructive obligation to repurchase or settle the options.

For the periods ended March 31, 2015 and 2014

The Company's stock options are detailed as follows for the reporting periods presented:

For the periods ended March 31, 2015 and 2014

The weighted fair value of stock options granted during the period was \$0.30 per option at the grant date.

The Company granted stock options to a director whose fair value was calculated using the Black-Scholes option pricing model based on the following assumptions:

	March 2015
Exercise price	\$0.57
Risk-free interest rate	0.70%
Average expected volatility	72%
Expected life (years)	3.75
Expected dividend yield	Nil

The underlying expected volatility was determined by reference to historical data over a period comparable to the expected life of options.

Warrants

Outstanding warrants allow holders to subscribe to an equivalent number of common shares as follows:

12. EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is calculated by dividing net income (loss) for the fiscal year by the weighted average number of common shares outstanding during the period. In calculating diluted loss per share for the period ended March 31, 2015, potential common shares, such as certain options and warrants, were not included as they would have the effect of decreasing the loss per share, which would have an antidilutive effect.

Both basic and diluted earnings (loss) per share have been calculated using net income (loss) for the period as the numerator, therefore no adjustment to income (loss) was necessary. The weighted average number of common shares outstanding is increased by the weighted average number of additional common shares that would have been outstanding had all the potentially dilutive shares been converted.

	As at March 31, 2015 [3 months]	As at March 31, 2014 [3 months]
Net income (loss)	\$(212,741)	\$19,597,561

Comprehensive income (loss): Other expenses	5,300	7,500

As at March 31, 2015 and December 31, 2014, an amount of \$16,786 was due from Anticosti Hydrocarbons General Partner Inc. In addition, as at March 31, 2015, an amount of \$34,806 [December 31, 2014 - nil] was payable to Anticosti Hydrocarbons L.P., while an amount of \$27,328 [December 31, 2014 - nil] was payable to Anticosti Hydrocarbons General Partner Inc.

As at March 31, 2015, the Company had a non-interest bearing advance from Anticosti Hydrocarbons L.P. in the amount of \$812,379 [December 31, 201 – \$258,819].

These transactions were in the normal course of business and measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

14. FINANCIAL INSTRUMENTS

The Company categorizes its financial instruments by class based on their nature and characteristics. Management determines the classification on initial recognition, which is normally the date of the transaction.

All income and expenses associated with financial instruments are presented in financial income and expenses.

For the periods ended March 31, 2015 and 2014

(a) Financial assets at fair value through profit or loss

Financial assets are classified at fair value through profit or loss when acquired principally for the purpose of selling in the near term, such as held-for-trading financial assets, or if so designated by management. Instruments in this category include cash and cash equivalents.

Financial instruments included in this category are initially and subsequently measured at fair value. Directly attributable transaction costs and changes in fair value are recognized in the consolidated statements of income (loss). Instruments in this category are presented in current assets.

(b) Loans and receivables and held-to-maturity financial assets

Loans and receivables and held-to-maturity financial assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are presented in current assets when they are recoverable within 12 months of the end of the period; otherwise, they are classified as non-current assets.

The instruments in this category include accounts receivable excluding sales taxes and tax credits receivable.

The financial instruments in this category are initially recognized at fair value plus directly attributable transaction costs and subsequently measured at amortized cost using the effective interest method.

At the end of each reporting period, the Company determines whether there is objective evidence of an impairment loss on a financial asset as a result of one or more events that occurred after the initial recognition of the financial asset affecting the asset's estimated future cash flows. Impairment losses are recognized under financial expenses in the consolidated statements of income (loss) and comprehensive income (loss).

For the periods ended March 31, 2015 and 2014

(c) Other financial liabilities

Financial instruments in this category are initially measured at fair value, net of transaction costs, and subsequently at amortized cost. Any difference between the initial carrying amount and redemption value is recognized through net income (loss) over the contractual term using the effective interest method. They are presented in current liabilities when they are payable within 12 months of the end of the period; otherwise, they are classified as non-current liabilities. Financing costs are amortized over the term of the financing using the effective interest method. This item includes trade and other payables, and bank borrowings.

(d) Fair value measurement

Fair value hierarchy

Financial instruments measured or disclosed at fair value are classified using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1 - Quoted prices [unadjusted] in active markets for identical assets or liabilities: cash is categorized within this level;

Level 2 – Valuation techniques based on inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly [i.e. as prices] or indirectly [i.e. derived from prices]: cash equivalents and bank borrowings are categorized within this level;

Level 3 – Valuation techniques for which a significant input for the asset or liability is not based on observable market data [unobservable inputs].

Determination of fair value and the resulting hierarchy requires the use of observable market data whenever available. The classification of a financial instrument in the hierarchy is based upon the lowest level of input that is significant to the measurement of fair value.

For bank borrowings, the carrying amount approximates fair value given the instrument's short-term maturity or that it bears interest at rates in line with market rates for similar financial instruments.

For the periods ended March 31, 2015 and 2014

Financial assets and financial liabilities are measured at fair value or amortized cost. The classification of financial instruments as well as their carrying amounts and fair values are presented in the table below:

15. CONTINGENCIES

Financing

The Company is financed in part by the issue of flow-through shares. However, although it has taken all the necessary measures in this regard, there is no guarantee that the funds spent by the Company regarding these shares will be deemed eligible by tax authorities in the event of an audit. Refusal of certain expenses by the tax authorities would have a negative tax impact for investors. Exploration work commitments that are not respected are subject to a combined tax rate of 26.9% (Canada and Québec). During the period ended March 31, 2015, the Company received an amount of \$2,182,800 [December 31, 2014 – \$2,506,924] following flow-through private placements for which it renounced the tax deductions. This amount must be incurred by December 31, 2016. As at March 31, 2015, the remaining eligible expenses to be incurred totalled \$1,987,302 [December 31, 2014 – \$368,004].

Environment and letters of guarantee

The Company's operations are regulated by governmental laws relating to environmental protection. Environmental consequences are difficult to predict, whether in terms of their outcomes, timing or impact. Currently, to the best of management's knowledge, the Company is operating in compliance with current legislation. To secure the completion of certain site closures, the Company has provided the Ministère des Ressources naturelles with guarantees amounting to \$930,000 as at March 31, 2015 and December 31, 2014.
