### 1. INCORPORATION, NATURE OF OPERATIONS, GOING CONCERN UNCERTAINTY, AND CONDENSED FINANCIAL INFORMATION

#### **Incorporation and nature of business**

The Company, incorporated under Part IA of the Québec *Companies Act* and governed by the provisions of the Québec *Business Corporations Act*, is an oil and gas exploration company. Its stock has been listed on the TSX Venture Exchange since February 16, 2005 under the symbol PEA. Its head office is located at 305 Charest Blvd. E., 10th Floor, Québec City, Québec, Canada G1K 3H3.

#### **Going concern**

These consolidated financial statements have been prepared on a going concern basis, which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business in the foreseeable future. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, 12 months from the period ended September 30, 2015. Management is aware, in making its assessment, of material uncertainties related to events and conditions that cast significant doubt upon the Company's ability to continue as a going concern. These consolidated financial statements do not include any adjustments to the carrying amounts of assets, liabilities, income and expenses and to classifications in the statement of financial position that would be necessary if the going concern assumption were not appropriate. Such adjustments could be material.

The Company has yet to determine whether its oil and gas properties contain economically feasible reserves. The Company's ability to generate revenue from its oil and gas properties hinges on its ability to economically operate its oil reserves, obtain the necessary financing to pursue property exploration, evaluation, development and construction, begin commercial production, or generate proceeds from the disposal of its exploration and evaluation assets.

For the periods ended September 30, 2015 and 2014

In addition to ongoing working capital requirements, the Company must secure sufficient funding to meet its existing obligations and commitments under exploration and evaluation programs and pay general and administrative expenses. Management considers that the current funds are insufficient to meet the Company's obligations and anticipated expenditures through to September 30, 2016. Any shortfall could be met in a number of ways in the future, including but not limited to, the issuance of new debt or equity instruments, additional cost-cutting measures or the introduction of new partners, on which the Company is already working. If management is unable to secure new funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than the amounts reflected in these financial statements.

### **Condensed interim consolidated financial information**

The financial information as at September 30, 2015 and for the nine-month periods ended September 30, 2015 and 2014 is unaudited. However, it is management's view that all adjustments required to present fairly the results for these periods have been made. The adjustments made were of a normal recurring nature. The interim consolidated operating results do not necessarily reflect the operating results anticipated for the full fiscal year.

### 2. BASIS FOR THE PREPARATION OF CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS

These condensed interim consolidated financial statements were prepared in accordance with applicable IFRS and IAS 34, *Interim Financial Reporting*, published by the International Accounting Standards Board ("IASB") and set out in the CPA Canada Handbook. The accounting policies and the methods of computation applied in these condensed interim consolidated financial statements are the same as those in the most recent annual financial statements. The condensed interim consolidated financial statements should be read in conjunction with the audited annual financial statements for the fiscal year ended December 31, 2014, including the notes thereto.

These condensed interim consolidated financial statements for the nine-month periods ended September 30, 2015 and 2014 were approved by the Board of Directors on November 25, 2015.

All amounts are expressed in Canadian dollars.

On October 22, 2004, the Company adopted a stock option plan under which it can grant a maximum of 10% of the number of shares outstanding to its directors, officers, key employees and suppliers on a continuous basis. The options granted to directors vest immediately and for other participants, over a period of three years.

#### 12. EARNINGS (LOSS) PER SHARE

Basic earnings (loss) per share is calculated by dividing net income (loss) for the fiscal year by the weighted average number of common shares outstanding during the period. In calculating diluted loss per share for the period ended September 30, 2015, potential common shares, such as certain options and warrants, were not included as they would have the effect of decreasing the loss per share, which would have an antidilutive effect.

Both basic and diluted earnings (loss) per share have been calculated using net income (loss) for the period as the numerator, therefore no adjustment to income (loss) was necessary. The weighted average number of common shares outstanding is increased by the weighted average number of additional common shares that would have been outstanding had all the potentially dilutive shares been converted.
